Assessment: Specification Report

Project: Student specified project on neural computation

Student: Minghong Xu (201601082)

Supervisor: Murat Uney

Feedback:

Guidance for improvements:

This is an ambitious proposal; however, the project specification document needs to be a bit more specific in the objectives and how they can be verified and validated. The project plan section should explain the overall plan, milestones, deliverables and their relation. Some visual results in Section 7 would be helpful. Some more references would also support the case made better.

Required for progression:

The risk assessment is complete and covers the risks inherent in the project: Yes

The ethical approval is complete and covers the potential ethical issues inherent in the project: Yes

Use of English (including grammar and spelling) is satisfactory: Yes
